Professional Summary

Experienced in full-cycle software product development, with a proven track record of delivering successful projects. Exceptional communication and interpersonal skills, able to build strong relationships with stakeholders and team members. Highly adaptable and skilled in organizational building, with the ability to thrive in fast-paced and dynamic environments. Proficient in agile development methodologies, with a strong understanding of how to apply these principles effectively to deliver high-quality software products.

Experience:

- **Orion Technology Ltd**

- Software Engineer (April 2024 - Present)**

- An IT and ITES company that is engaged in providing sophisticated technologies, services and solutions that helps local business..

- Major Accomplishment:**

- Built a cross-platform mobile app in React Native with Redux for efficient state management.
 - Integrated FCM push notifications, Meta WhatsApp messaging, and biometric login (Fingerprint/Face ID).
 - Developed an Admin Dashboard in React.js + Redux Toolkit with real-time analytics and user/business insights.
 - Enabled push notifications and WhatsApp messaging directly from the dashboard.
 - Implemented a Node.js backend with secure APIs supporting mobile and web apps.

- **Nimap Infotech**

- Software Engineer (Dec 2021 - March 2024)**

- Nimap Infotech is a global IT outsourcing and software development company serving Fortune 500 companies and fast-growing organizations worldwide, offering innovative solutions that help businesses grow, adapt, and succeed in a digital world.

- Major Accomplishment:**

- I transformed UI designs into responsive and interactive components using ReactJS and Redux, actively contributing to the overall front-end development of projects.
- Actively contributed to the successful completion of front-end development tasks, delivering high-quality solutions that met project requirements and exceeded client expectations.

- **Affinity Express**

Website Developer (May 2019 - Dec 2021)

AffinityX is Utilizing our proprietary performance data derived from millions of engagements and driven by next-generation technology, the AffinityX team simplifies the complexity of omnichannel marketing for clients of all sizes, resulting in high-impact solutions crafted with precision to achieve your goals efficiently and cost-effectively.

Major Accomplishments:

- Designed and developed websites on WordPress, implementing custom layouts, themes, and plugins for better user experience.
- Enhanced site functionality and visual appeal by applying JavaScript for interactivity and CSS for responsive styling.
- Collaborated on bug-fixing tasks for GoDaddy-hosted websites, addressing performance issues, broken links, and compatibility errors.
- Used JIRA to track, prioritize, and resolve tickets systematically, ensuring smooth workflow and clear communication with the team.

- **Salezcraft Global E-Services LLP**

Associate Data Analyst (Feb 2017 - Oct 2017)

An global on-demand Lead Generating Company aiming to overcome multiple hurdles and challenges related to the B2B Demand and Data-driven Scheme.

Major Accomplishments:

- Function Requirement Understanding and Communication with the user coordinator.
- Resolving technical issues faced by other team members and generating reports.

Projects Undertaken

- **TheFutur** (client: Orion Technology)
 - Successfully developed and launched a cross-platform mobile app (iOS & Android) that enables users to discover and connect with local businesses in Mauritius efficiently.
 - Implemented Firebase Push Notifications, Biometric login, and Dynamic Links, enhancing user engagement, security, and retention.
 - Built a feature-rich Admin Dashboard that allows real-time tracking of Daily Active Users, Active Businesses, and Total Registrations, helping the organization make data-driven decisions.
 - Enabled admins to send notifications and WhatsApp messages directly from the dashboard, improving communication with users and businesses.
 - Created robust APIs with filtering and pagination, ensuring smooth data retrieval and optimal performance for both the app and dashboard.
 - Integrated WhatsApp Meta and payment gateways, streamlining business interactions and in-app transactions.
 - Deployed the Dashboard and backend APIs on DigitalOcean, ensuring high availability, reliability, and scalability of the platform.
 - Enhanced user experience with dynamic forms, smooth UI animations, and interactive components, resulting in positive user feedback and higher engagement.
 - Developed filtering, search, and business management features that empowered admins to efficiently manage users and businesses.
 - Developed dockerized microservices using node js and API service using express framework.
- **Alchemy** (client : Godrej Properties).
 - Designed and developed dynamic pages and interactive forms in React to support course enrollment and management workflows.
 - Implemented API integration to fetch and manage course-related data, ensuring seamless interaction between frontend and backend services.
 - Developed reusable UI components (tables, forms, navigation elements) to maintain consistency across the Admin Panel.
 - Created a navigation system with React Router to enable smooth transitions between different sections of the portal.
 - Applied form validation and error handling to provide a smooth experience for admins and employees during course assignment.
 - Optimized frontend performance by minimizing re-renders and improving API request handling.

- Collaborated with teammates during code reviews, ensuring maintainable, high-quality code delivery.
- **NTTS (client : Nimap Infotech.)**
 - Developed reusable and modular components in React to ensure scalability, maintainability, and efficient code reusability across different modules of the NTTS platform.
 - Implemented state management using Redux Toolkit, enabling predictable state handling and improving the overall performance and maintainability of the application.
 - Utilized React Hook Form for form handling and validation, ensuring smooth user input management, error display, and validation of learning path modules.
 - Integrated the Admin Panel with backend APIs to perform CRUD operations (Create, Read, Update, Delete) and retrieve data efficiently, ensuring seamless communication between frontend and backend services.
 - Applied error handling mechanisms for API interactions to provide a smooth user experience and maintain application reliability.
 - Conducted unit and functional testing throughout the development process to identify, debug, and resolve issues, thereby improving the stability and quality of the application.
 - Collaborated with team members to align development with business requirements and delivered a user-friendly admin panel that supports mentors and administrators in managing learning paths and module reviews.

Education:

- BE(Computer Science) - Computer Science Department, Pune University (Year-2016)
- Dip(Computer Science) –Sinhgad Institute(2010-2013)

Technical Skills:

- React Js, React Native
- Nodejs, Javascript, expressjs, JQuery, JSON, AJAX
- HTML, CSS, Twitter Bootstrap
- Linux, Git, jenkins, docker
- DigitalOcean, CloudFormation
- Firebase, MongoDB, GraphQL
